# Background and context

First shared these findings at a Digital Leader's salon event on the 11th March.

When we put the survey together, I didn't appreciate the relevance and importance of the questions we posed about developments in the last ten years.

# 2020 tech trends survey

## Questions we wanted to explore

We were seeking a view from technologists, across industries and seniority, about which technologies had and would have the greatest impact.

### Questions for the IT industry?

How does it feel about the future?

What challenges does it face?

How prepared is it to face the next decade's challenges?

What trends will come to the forefront?

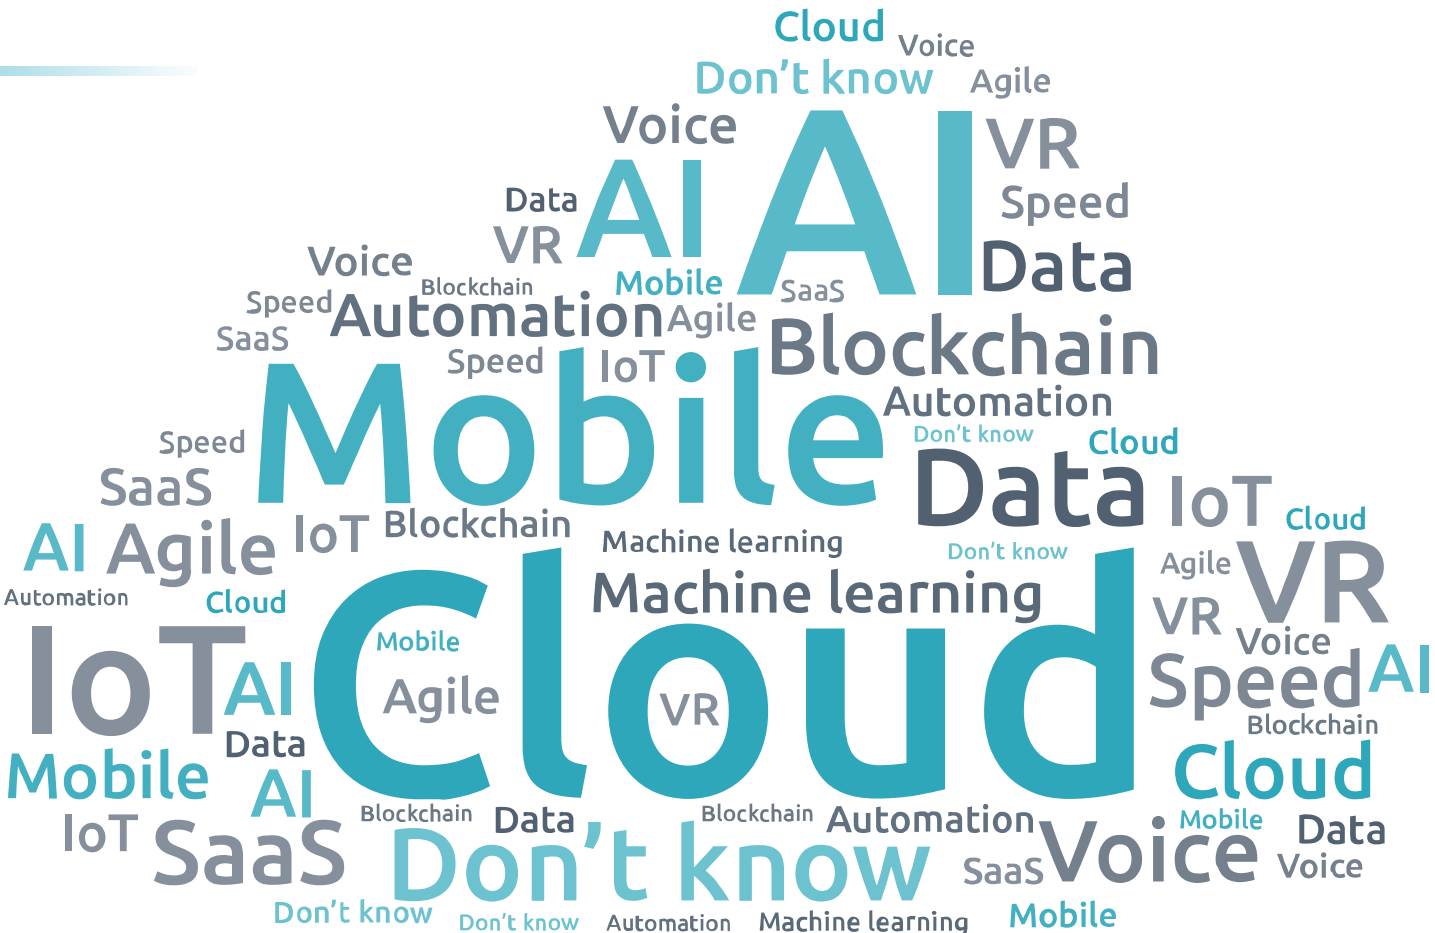

## Survey demographics

Q: What do you see as the most significant technological development of the last ten years and why?

1	Cloud
2	Mobile/Smartphones
3	AI

4	Data	9	Speed
5	Machine Learning	10	IoT
6	Automation	11	SaaS
7	Blockchain	12	Virtual Reality
8	Voice	13	Agile

# The importance of cloud & mobile

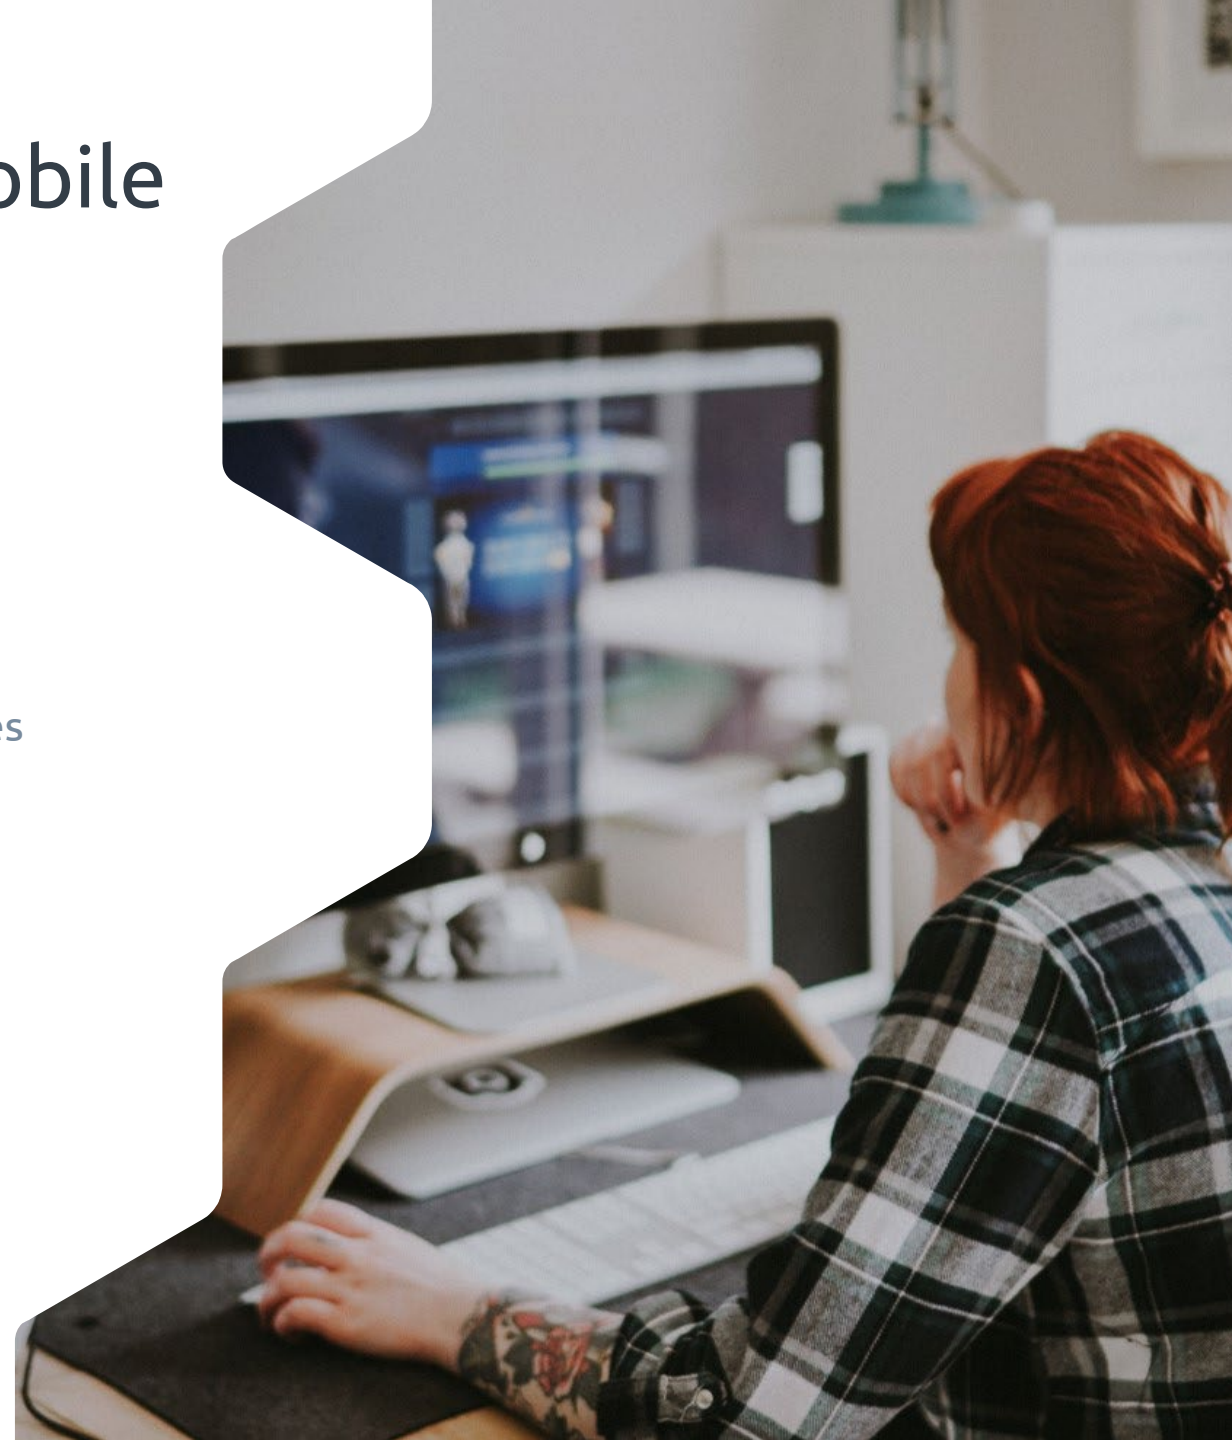

## The new homeworking imperative

Our kids are at home taking lessons via Google Classroom or Microsoft Teams.

Our colleagues are working on transformation programmes on an entirely distributed basis.

Our vulnerable are able to order their groceries and essential needs online.

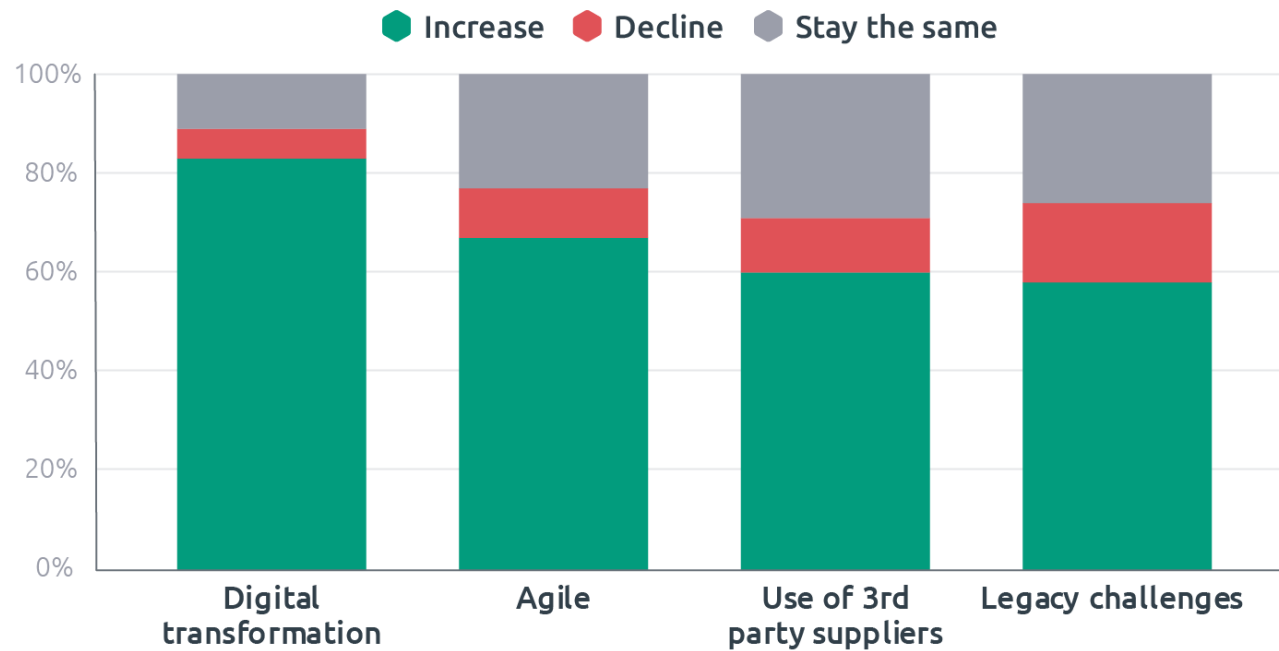

Families are staying in touch through WhatsApp groups.

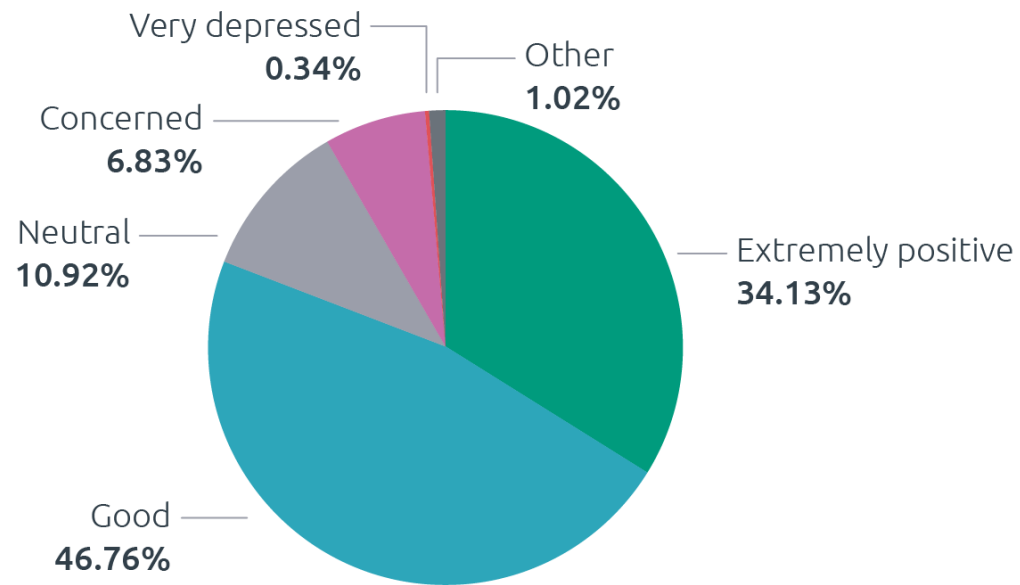

# Future trends

How will these trends change over the next ten years?

# Optimism and budgetary pressure

**Looking forward to 2020, how are you feeling about the future technology landscape?**

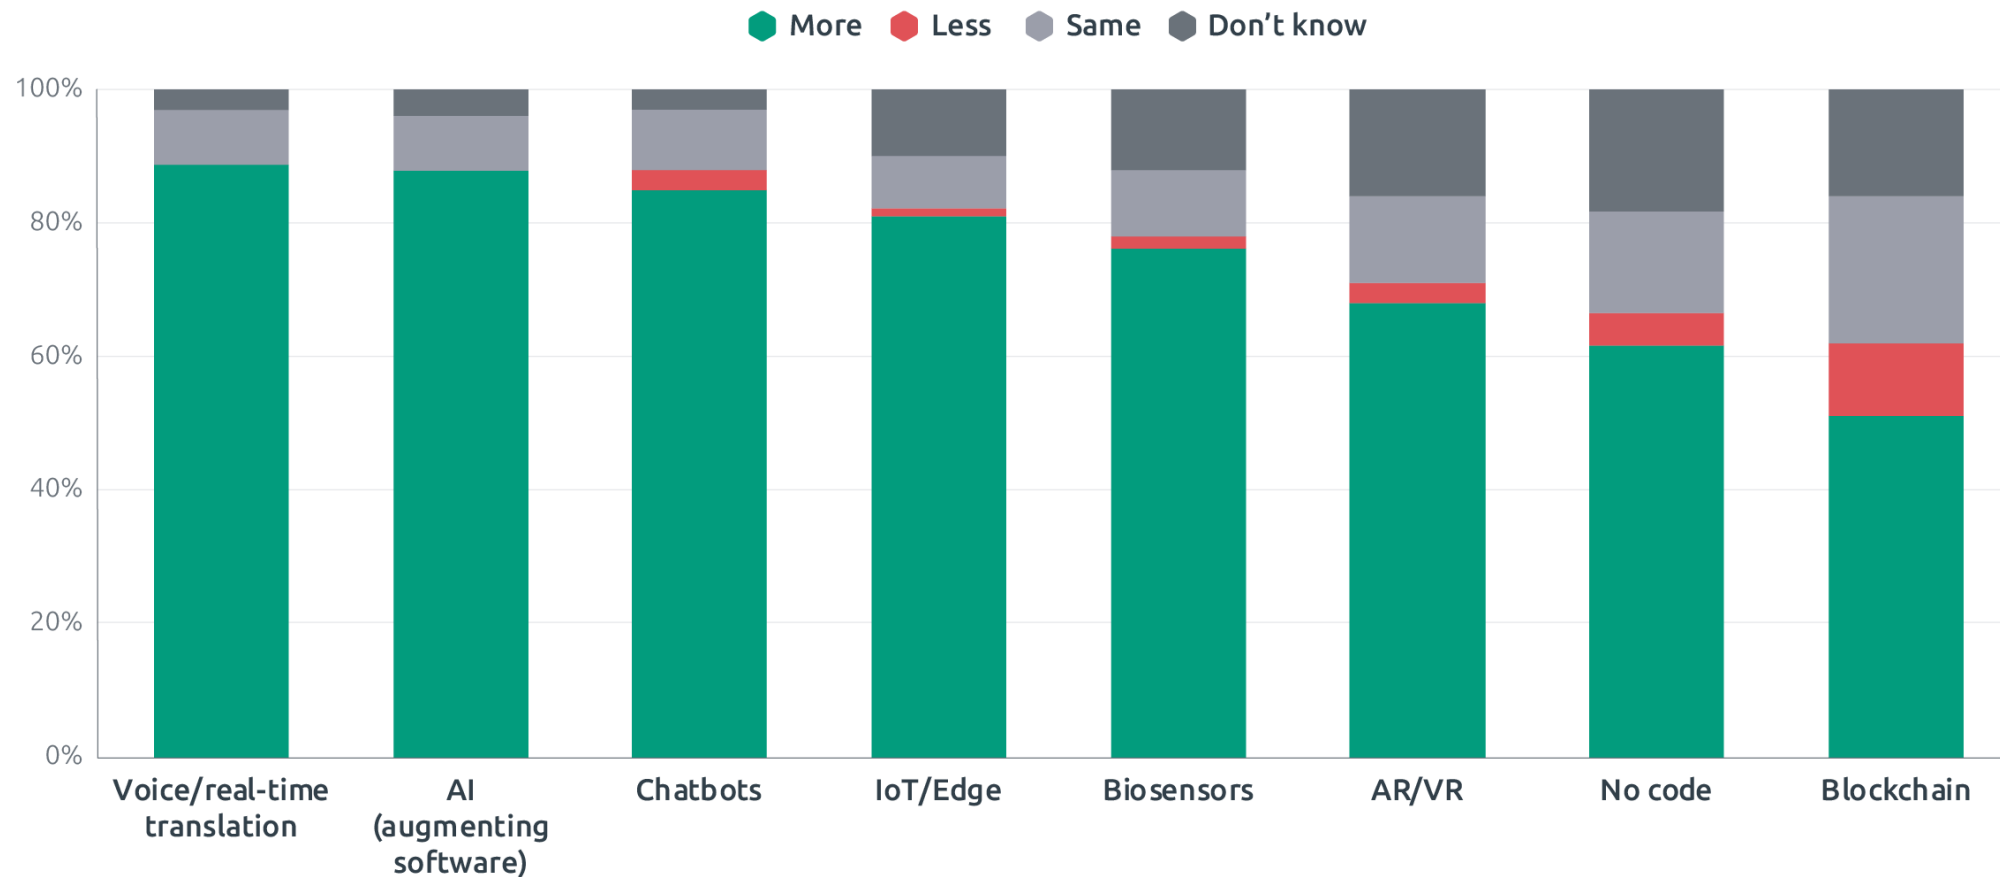

**Describe your current view of the budgetary pressure you will experience in 2020**

# How do you believe the trend for the following will change in the next ten years across your sector?

# What best describes how you feel the digital skills shortage will develop in the next three years?

# Digital skills shortage by sector

	Private	Public	Third
The shortage will increase or get significantly worse	53%	49%	62%
Things will get easier or there will be no issue	28%	39%	27%

# AI endures, while mobile swings to IoT, automation and uncertainty

Comparison of the last and next ten years

“Adoption and use of AI and machine learning will radically reform both the workplace and the socio-economic landscape.”
